Cutting instructions for wrap piece sender:

SBP wrap conversion slings are measured from the center of the taper, as per the diagram below:

When cutting a wrap for a sling piece, remember the following:

1. The length that you will cut (measured from the center of the taper) is the sling length stated above, plus 3" for standard pleats or 6" for Eesti shoulder. If the wrap has not been washed, please also add at least 4" to account for shrinkage when the sling is washed.
2. Please cut a straight line across the width of the sling. Directions for making a clean cut are available here: <http://sleepingbaby.net/wrapcut.php>
3. If you have already cut a taper in the wrap to make a shorty, please do not measure the ring sling piece along the tapered edge; it must be measured from the center of the taper to the shortest part of the taper (where the cut begins). Measuring along one long tapered edge will result in the sling being too short if the buyer is counting on a certain length.

4. The buyer may have indicated a preferred shoulder. If the wrap has an asymmetrical design, in which the wrap must be worn with one edge up, the piece should be cut so that the design is right-side up on that shoulder. The following diagram should be helpful in cutting the wrap so the orientation is correct for their preferences.

Mailing the piece:

Please package the piece carefully:

- The standard procedure is to fold the fabric and seal it in a zip-top plastic bag; this will protect it from water and dirt, should the outer envelope be torn in transit. Please do not send pieces braided; this results in significant wrinkles.
- Please do not use grocery store bags, as they do not provide adequate protection from the elements.
- I recommend the free Tyvek Priority Mail envelopes available at the post office. The paper flat-rate envelopes (FREs) – paperboard or padded – are NOT recommended; the paperboard ones tear very easily, and the paper padded ones are not much better and are prone to tearing and puncture damage. I have never had a paper FRE arrive undamaged in some way. The new plastic padded FREs are fine, but please do not stuff them full – they are very difficult to open in that case. If you are sending a whole wrap or several pieces, please seal them in zip-top bags and use a flat-rate cardboard box, also available at the post office.

Please address the package as follows:

[Recipient's name] c/o Jan Heirtzler
 Sleeping baby productions
 12 Davis Ave
 Durham, NH 03824-1940

* Be sure you have put NH (New Hampshire) and not NC (North Carolina). There is a Durham, NC, but sending the package there will result in a substantial delay as they forward the package to me.
